Miss Katherine Kinsella
American Program Bureau
59 Temple Place
Boston, Mass. 02111

Dear Miss Kinsella,

After writing you two months ago, we got sick, both of us, I got tied up preparing for two suits against the government we are about to file on the suppression of evidence in the John Kennedy and King/Ray cases, and I laid the enclosed aside to await the return of the picture for which I asked so I could have my artist prepare a layout.

If you have any suggestions about the enclosed draft, please make them. When I get the picture, I will have the brochure made.

The first of the suits to be filed is given a marvelous back-drop by the new attack on the press, for it is the opposite side of the same coin. It should establish not only that the federal government suppressed the basic evidence in the King/Ray case, but that it is suppressing the evidence of a public trial where this evidence is contrary to what was alleged, in court, in the Ray "mini-trial". Attorney General Mitchell, acting through Deputy Attorney General Kleindienst, has actually denied the Justice Department has that evidence used to get Ray extradited from England, all of it certified by Ramsey Clark, his predecessor, and claims that even if they have it, this public evidence in a public trial can be suppressed as part of an "investigative file"! Orwell is alive and well in Washington! Under the law, when this suit is filed it automatically goes to the top of the docket, so it should not be long.

The recent Chicago murders are an outgrowth of what is detailed in my unprinted COUP D'ETAT, dealing with the King murder, which is what got Dick Gregory to speak to you about me. The preludes to these murders are all in the book, which shows that despite their present denials, the FBI started the while thing, there and in other cities. The book in fact, says there will be such murders. It is not comforting to have been a prophet.

Sincerely,

Harold Weisberg
